

I.J.W.

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Application of: Fransted

Serial No.: 10/675,753

Art Unit: 3723

Filing Date: September 30, 2003

Examiner: Robert C. Watson

Title: **Apparatus for Removing Heavy-Duty Brake Drum Bolts**

PETITION TO ISSUE CORRECTED PATENT UNDER 37 C.F.R. § 1.322(b)

Commissioner of Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

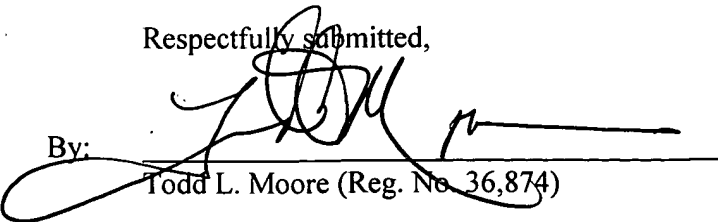

Patentee hereby petitions the Director to issue a corrected patent pursuant to 37 C.F.R. § 1.322(b) in order to correct a mistake in the above-referenced United States Patent, incurred through the fault of the office, that is of such a nature that a Certificate of Correction is inappropriate in form. The above-referenced United States Patent has issued with drawings that are illegible. Particularly, the drawings of the issued patent do not have solid, black lines of appropriate weight as required by 37 C.F.R. § 1.84, and thus, the drawings did not reproduce legibly during the printing process. Accordingly, the drawings should have been objected to under 37 C.F.R. § 1.84, and new drawings should have been required. The patentee has enclosed herewith corrected drawings that comply with the requirements of 37 C.F.R. § 1.84. The enclosed drawings do not make any substantive changes to the originally filed drawings. The patentee respectfully requests that these drawings be incorporated in a corrected patent issued under 37 C.F.R. § 1.322(b).

If there are any questions regarding this matter, the Applicant's Attorney may be reached at (734) 662-0270 or via electronic mail at tlmyb@aol.com.

Respectfully submitted,

DATED: October 26, 2005

By:

Todd L. Moore (Reg. No. 36,874)
